Blocksmith Labs
Forging the future of Web3, one product at a time.

Presented by Alex.BSL | Built on SOLANA

MISSION

To make winning safe and accessible for everyone.

Zelo combines the best of both worlds: the security of traditional finance (**TradFi**) savings and the exciting potential of **DeFi yield**, creating a verifiably random way to **save and win**.

Issues & Impact

ISSUE
Traditional savings accounts offer low-interest rates.

IMPACT
Disinterest in low-yield savings accounts.

ISSUE
Traditional lotteries entail high risk with a slim chance of winning (usually 1 in several million).

IMPACT
Lotteries pose a high risk of losing the principal investment.

SOLUTION

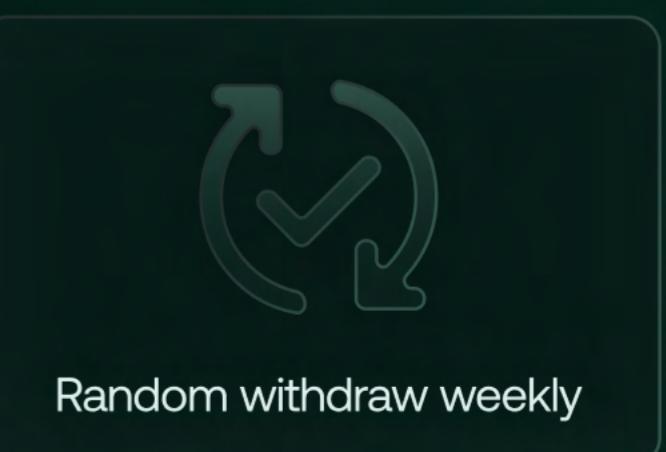

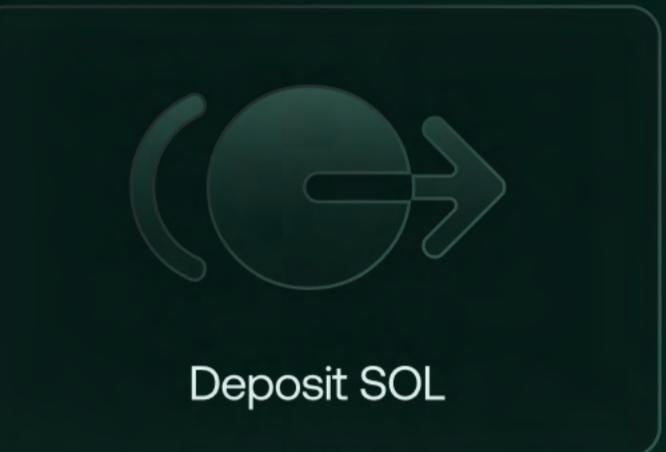

Zelo Protocol, a lossless savings protocol where each deposit earns a chance to win big without risking the principal.

POSITIVES

Safe earnings, the thrill of lotteries, higher effective returns, and the best of DeFi exposure.

HOW IT WORKS

User deposits are placed into a liquid staking pool to earn yield. Winners are chosen in a verifiably random manner to win the accrued yield, while all participants retain their deposits.

Competition & Market Opportunity

PoolTogether is the market leader with a similar prize savings lossless lottery protocol and approximately \$9.14M in Total Value Locked (TVL).

PoolTogether operates primarily on Ethereum and other Layer 2 solutions with higher transaction fees. Zelo utilizes Solana's speed and low transaction costs for instant deposits/withdrawals and maximized winnings.

Use of funds

Allocation to Solana program development, continuous security auditing, marketing efforts, and legal compliance.

Go-to-Market Strategies

\$302,155.32

Initial rewards pool will be directly funded to attract users, not solely relying on yield.

[Connect wallet >](#)

Wallet integrations for easy one-click deposits and withdrawals.

Q4 2023

Development of Solana program, liquid staking (mSOL) integration for yield, security audits, establishment of a single weekly winners pool.

Q1 2024

Airdrop governance token to protocol users, integration with additional high-yield DeFi platforms, introduction of more pools with various configurations, support for USDC/USDT/SPL tokens.
